

AHCCCS Case Study

Client Profile

In 2002, the State of Arizona's Medicaid Program (AHCCCS Arizona Health Care Cost Containment) issued an RFP for a transplant consultant program. Cyrca bid on, and was awarded, the contract.

Business Challenge

The AHCCCS program realized that it did not possess the internal staffing to effectively keep its transplant criteria up-to-date. Additionally, it needed an expert in transplantation to make individual determinations for potential transplant candidates presented for review.

Cyrca Solution

Cyrca presented AHCCCS with its credentials for performing these tasks. Cyrca was able to win the award because of a corporate commitment to be on the cutting edge of transplantation issues and of our ability to respond in an effective manner on individual cases.

The Results

Due to Cyrca's involvement with AHCCCS, they have been able to adopt new medical criteria guidelines, issue a new participating facility RFP, and have a consistent and defensible review process for individual transplant cases presented. Cyrca is proud that it had a role in making this all possible in less than one year of the relationship.
